

Left-Brained Written Word

Documentation and thoughts so far

Undertaking Steps:

1) Collect:

File Downloaded- HC_XML_Master_v9f.xml
File Size- 17 MB (4.2 MB Compressed)

2) Prepare (WIP):

XML Database Created in BaseX

Query:

```
CREATE DB HC /Users/rishirajani/Documents/Text Tech  
/Project/corpora/HC_XML_Master_v9f.xml
```

Result:

Database 'HC' created in 1255.47 ms.

Size of Database: 23.7 MB

Analysis of Corpus

(a) Query to find # of Texts per period

Results:

Period	Text Count
-850	10
850-950	18
950-1050	49
1050-1150	6
1150-1250	14
1250-1350	17
1350-1420	42
1420-1500	33
1500-1570	44
1570-1640	48
1640-1710	46

(b) Query to find the target Early Modern English (EME) Texts from the corpus

Results:

Target Texts successfully identified. **Further analysis required.**

Above 2 Queries for the Analysis and a sample output of the target identification attached separately with the documentation.

3) Access (WIP):

Proposed Schema for the Relational Database stored in Postgres post the encoding of the corpus-
